STORM DRAIN INLET PROTECTION

Erosion Control Along Ditch

Silt Fence Assembly

General Notes:

All areas where existing vegetation and grass cover have been removed by construction or shall be accurately blocked sodded or hydroseeded and watered until growth is established or developed areas where grass is present, block sod will be required. Bare areas shall be seeded or sodded within 14 calendar days of last disturbance.

Approved erosion control measures must be installed during the entire time that earth has been cut by construction and shall stay in place until acceptable vegetative growth is established after construction is complete and then removed by contractor.

All erosion control measures should be cleaned of silt after every rain.
